Abstract: Molecules of the title compound, $\mathrm{C}_{23} \mathrm{H}_{30} \mathrm{~N}_{2} \mathrm{O}_{4}$, are located on a crystallographic mirror plane. The molecule has a curved shape with the dihedral angle formed between the two benzene rings being 55.26 (5) ${ }^{\circ}$. Intramolecular $\mathrm{O}-\mathrm{H}$ ... N hydrogen bonds are noted. In the crystal, supramolecular layers are formed in the $a c$ plane owing to the presence of C-H. - $\pi$ interactions.
